1. The following is an examiner's statement of reasons for allowance:

Applicant's arguments against the primary reference to Dobson, Jr. et al (5,783,527), set forth in their Amendment dated December 2, 2005, are concurred in. It is further noted that the water-soluble organic hydroxyl compounds set forth in Dobson, Jr. (col. 8, line 52 - col. 9, line 3) referred to in the previous Office action, in not having a carboxyl group, do not appear to even comprise a chelating agent(s), and are described as "other activators".

The newly-cited references disclose methods of treating a subterranean formation with viscous treating fluids including a delayed viscosity breaker(s). In particular, Todd (6,954,254) discloses that the delayed polymer breaker composition, which comprises an at least partly water soluble hydrogen peroxide source, such as pentanedione peroxide, may further comprise both a ferrous ion source and a chelating agent, such as citric acid (note col. 3, lines 9-35). Todd, however, taken either singly or in combination, does not fairly teach or require the step/limitation in independent claims 1, 13 and 22 wherein the said delayed polymer breaker composition "comprises a molar excess of the chelating agent relative to the ferrous ion source".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Suchfield whose telephone number is 571-272-7036. The examiner can normally be reached on M-F (6:30 - 3:00).
